

HIGHWAY LIGHTING SOLUTIONS Ltd

Road Lighting Design Service for Developers,
Consulting Engineers & Councils

Welcome to HLS Ltd

Here at Highway Lighting Solutions we understand the issues associated with good road and amenity lighting. Through our experience, we provide the solutions to create an appropriate, efficient and cost effective lighting scheme. Utilising the latest industry standard design software and AutoCAD drawing packages, we provide a professional design and consultancy service to Developers, Consulting Engineers and Councils throughout the UK.

BENEFITS OF A PROFESSIONAL LIGHTING DESIGN

- ✓ Will minimise your purchasing, installation and connection charges
- ✓ Provide long term savings from maintenance and running costs
- ✓ Ensures correct levels of illuminance and luminance where needed
- ✓ Enhances an area and improves it's safety and security
- ✓ Reduces the risk of accidents for all road users

For private and adoptable schemes, all designs comply to the latest British and European standards and regulations. Where adoption is required, we will liaise directly with the Local Authority to ensure your design conforms to specifications for delivery with technical approval. In line with your quality procedures, all of our designs are covered by professional indemnity insurance.

OUR LIGHTING DESIGN SERVICE

- Residential Developments
- Footpaths and Cycleways
- Public Amenity Areas & Car Parks
- Home Zone Initiatives
- Traffic Calming Schemes
- Roads, Roundabouts, Dual Carriageways

OUR SURVEYING SERVICE

- Survey and Evaluation of Existing Lighting Schemes
- Lighting level Measurements and Technical Reports
- As-fitted Drawings

Being independent and not tied to any particular manufacturer, our designs will utilise products from all of the major ranges. We don't over specify on equipment, but will work with you to keep your costs to a minimum and your budgets achievable.

OUR DESIGN SERVICE

Our professional lighting designs can save thousands of pounds in installation and maintenance costs. Optimising the performance of each lighting unit, our designs meet all current standards without over-specification. Since many of our designs cost less than the price of a single column installation, the benefits of our service far outweigh the costs - a wise investment!

YOUR LIGHTING DESIGN PACKAGE

Our design service is flexible and tailored to your specific needs. Working closely with you, we achieve the most suitable lighting solution, providing the opportunity for your comment prior to completion. Where your scheme is to be adopted by the Local Authority or subject to Planning approval, we will liaise with the Authority on your behalf to obtain technical approval.

- ✓ Lighting Design drawing complete with column positions and schedule of equipment
- ✓ Technical Report containing calculations and all necessary supporting documentation
- ✓ Local Authority technical approval for all adoptable schemes
- ✓ Design package complete and ready for tender procedure or installation
- ✓ Full technical support

CONTACT US FOR A COMPETITIVE QUOTATION

Fees for our complete design service are very competitive. Being an independent and flexible company with low overheads enables us to offer a cost effective and professional lighting design service. Contact us now to discuss your requirements:
